

Damascus Site Project

We placed metal marker on a basalt boulder near a large black oak on S.E. corner. We used a star drill to bore 4 holes. The bolts did not quite line up, but it worked. About 25 class members and approx 12 Forest Hill Historical Society members participated.

Bullet proof metal plaque bolted
to a basalt boulder. Actual
Toren site a couple hundred feet
to the south, its now laced
with several gullies and slides.
